PROFILE INFO

A passionate Computer Science student at **Khon Kaen University** aspiring to become a Full-Stack Developer. Skilled in both front-end and back-end development with experience in frameworks such as Laravel, Kotlin (Android Studio), and Godot.

Eager to learn, collaborate, and contribute to real-world projects in a fast-paced environment, while continuously improving technical and problem-solving skills.

EXPERIENCE

September 2025 - Present

Khon Kaen University | Khon Kaen

University Project Development

- Developed a full-stack web application "**Archery Club Management**" using Laravel and MySQL.
- Designed database schema and CRUD operations for inventory and member management.
- Implemented authentication, admin dashboard, and real-time updates.
- Deployed using Railway and GitHub collaboration tools.

April 2025 - August 2025

Khon Kaen University | Khon Kaen

Game Developer (Team Project)

- Created "**Shadow of Ayutthaya**," a 2D stealth-action game developed in Godot 4.
- Implemented AI detection, stealth mechanics, QTE combat, and health systems.
- Designed original pixel-art assets and integrated environmental interaction.
- Used GDScript and signal-based architecture for modular gameplay logic.

January 2024 - March 2024

Khon Kaen University | Khon Kaen

University Project Development

- Built "**Calendar X**," a Flutter-based mobile app for task scheduling and time management.
- Created a seamless user interface design in Figma, following Material Design principles.
- Integrated Google Calendar API for cross-platform event synchronization.
- Ensured smooth performance across both iOS and Android platforms.
