PROFILE INFO

A passionate Computer Science student at **Khon Kaen University** aspiring to become a Full-Stack Developer. Skilled in both front-end and back-end development with experience in frameworks such as Laravel, Kotlin (Android Studio), and Godot.

Eager to learn, collaborate, and contribute to real-world projects in a fast-paced environment, while continuously improving technical and problem-solving skills.

EXPERIENCE

April 2026 - July 2026

Alpega TMS Asia Co. Ltd., | Khon Kaen

Junior Software Engineer Internship

- Contributed to the development of enterprise web application features for a Transportation Management System.
- Built and enhanced frontend components using Angular, TypeScript, SCSS, and Angular Material.
- Collaborated with senior developers to implement UI improvements, fix bugs, and ensure consistent application behavior.
- Supported code quality improvements through accessibility fixes, SonarQube issue resolution, and component refactoring.

December 2025 - Present

Khon Kaen University | Khon Kaen

Nurse Learning Platform

- Develop the entire website, both front-end and back-end, using HTML, CSS, and JS.
- Collaborate with the Faculty of Nursing, Khon Kaen University.
- Manage the database and maintain the system using Supabase, a noSQL database.
- Deploy on the Vercel website.

September 2025 - January 2026

Khon Kaen University | Khon Kaen

University Project Development

- Developed a full-stack web application **"Archery Club Management"** using Laravel and MySQL.
- Designed database schema and CRUD operations for inventory and member management.
- Implemented authentication, admin dashboard, and real-time updates.
- Deployed using Railway and GitHub collaboration tools.
